## PROJECTS:

### 1. Cropwise Imagery

<https://play.google.com/store/apps/details?id=com.syngenta.imagery>

The Cropwise Imagery app brings the power of satellite imagery to your mobile device. Monitor changes at the field level while on-the-go and send important updates directly via text, email or your favorite messaging app.

## PLATFORMS & TOOLS

Android Studio, Kotlin, CircleCI

## Responsibilities

1. Worked on several modules like Prescriptions, Notes, Fields/property creation, Maps(Mapbox) etc.
2. Added offline support for the modules.
3. Worked on a Realm database for offline storage.
4. PR reviews and defect fixes.
5. Written Test cases for the modules.

### 2. TOPS CLUB (Central Thailand Project)

<https://play.google.com/store/apps/details?id=com.org.central.club>

Developed an e-Commerce Android application from Scratch available in Thailand and nearby countries. Worked on Several modules.

1. Worked on several modules like Cart, Wishlist, Product Listing Page(PLP), Product description Page(PDP), Home, OnBoarding modules for Guest as well as Customer login.
2. Provided support for Huawei devices and Huawei store which don't have google play services(Maps, Location, Push notification)
3. Provided Hypercare production support to resolve production defects.

### 3. TOPS Online - Food & Grocery

<https://play.google.com/store/apps/details?id=com.iplus.tops>

Worked on redesign e-Commerce Android TOPS application which is available in Thailand and nearby countries.

1. Worked on Dashboard redesign and api integration.
2. Defect fixes and production support.

### 4. Central App - Shopping Online

<https://play.google.com/store/apps/details?id=com.centraldepartment.app>

Worked on e-Commerce Android TOPS application which is available in Thailand and nearby countries.

1. Worked on maintenance of the Project.
2. Feature enhancement and defect fixes.

## 5. Huru Family

Huru can help to stay in touch with family members or friends who are not comfortable using smartphones or laptops. This app enables voice, text and video messaging as well as video calling.

Using Huru, the person receiving the message can choose not to interact with the device at all, they can simply see it played at a chosen time on the Alexa device.

This can be transformational for people who lack confidence with technology and many quickly graduate to sending their own messages and exploring other features such as family photo albums or checking the lotto numbers!

### PLATFORMS & TOOLS

Alexa developer console, AWS Lambda, S3 Storage, AWS Cloud Watch

### Responsibilities

- Screen designs using APL.
- Intents Handling using NodeJS
- AWS Lambda function deployment
- Skill setup and intents/slots design in alexa developer console.
- SmartHome device integration.
- Api integration.

### Other Projects:

#### 1. Studbooks

<https://play.google.com/store/apps/details?id=com.studbook>

#### 2. TeaTyme

<https://play.google.com/store/apps/details?id=com.teatyme>

#### 3. Vritti

<https://play.google.com/store/apps/details?id=project.com.india.ripple>

#### 4. Watsoo Reporting

<https://play.google.com/store/apps/details?id=com.watsoo.sales>

#### 5. Shield Report

<https://play.google.com/store/apps/details?id=com.shield.shieldreport>

#### 6. Obairs India

<https://play.google.com/store/apps/details?id=com.ondemand.customer>

#### 7. Loco Bubbles

<https://play.google.com/store/apps/details?id=com.locolanguages>
